

## General Notes on Budget and Levy

The Town Board is making every attempt to hold down property taxes as we move forward. The levy for 2023 collected in 2024 is asking for no additional increase. The only increase in the levy as allowed by the State is for net new construction. With what the State permits without permission from the electors shows that last year's mil rate was .0024291 or \$242.91 per \$100,000 in value. The levy limit the state permits with net new construction is .0024460 or \$244.60 per \$100,000 in value. A total increase of \$1.69 per \$100,000 in value.

As stated above, the Board is attempting to hold down property taxes. The Board has committed all remaining ARPA funds to the capital expenses of the new fire stations and also the State's New ACT 12 funds the town receives for emergency services. This commitment by the board, will help keep your property taxes down.
